ROHDE & SCHWARZ

Make ideas real

Rohde & Schwarz SwissQual AG, as the issuer of this document, certifies that

Telia Eesti AS
Mustamäe tee 3
15033 Tallinn
Estonia

attained the

Best Network Performance Score

for Estonia, assessed during the 2025 nationwide mobile network benchmarking campaign from September 19 to October 11, 2025. We congratulate **Telia Estonia** for ranking first with a score of **829 out of 1000 points**, that corresponds to 83% of the maximum achievable score, on the Rohde & Schwarz Network Performance Score in line with ETSI TR 103 559.

- Network Performance Score for voice service: 380 out of 400
- Network Performance Score for data service: 448 out of 600

NETWORK PERFORMANCE SCORE

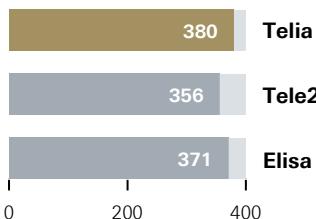

Commissioned by Telia, Rohde & Schwarz SwissQual AG performed a mobile network benchmarking campaign assessing the quality and performance of Estonia's leading mobile operators. The drive-test based data collection campaign was implemented from September 19 to October 11, 2025 and covered Estonia's main cities, towns and roads.

During this mobile network benchmarking campaign, over 12,850 voice calls and over 129,200 individual data service tests were performed to calculate a Network Performance Score in line with ETSI TR 103 559.

Data Data Score

Measurement campaign overview

- **Driven kilometers:** 5,740 km
- **Time period:** September 19 to October 11, 2025
independently selected by Rohde & Schwarz SwissQual AG
- **Test routes:** Covering >64 % of Estonian population,
routes selected independently by Rohde & Schwarz SwissQual AG
based on population and population density
- **Network operators:** Elisa, Tele2, Telia

MEASUREMENT CAMPAIGN METHODOLOGY

Rohde & Schwarz SwissQual AG applied a fully transparent, harmonized and end-user centric scoring methodology as described in ETSI TR 103 559 and calculates a single overall Network Performance Score in line with this integrative methodology.

The scoring methodology includes essential aspects of popular mobile services and the resulting Network Performance Score reflects user's perceived performance of a mobile network in daily use regardless of the available technologies. The overall Network Performance Score is an aggregation of rated service performance over different regions covered by mobile networks with a state-of-art mobile phone.

- ▶ Data collection and analysis follows established standards and rules as defined in ETSI and ITU-T.
- ▶ The performance assessment uses tests of popular services in mobile networks, such as voice telephony, data transfer, video and app-specific services.
- ▶ The applied methodology provides insights into dedicated service classes and individual KPIs as well as for individual pre-defined geographical or morphologic categories.
- ▶ The entire measurement campaign used state-of-the art smartphones supported by all operators in Estonia.
- ▶ Data collection and analysis used Rohde & Schwarz SwissQual AG de-facto industry standard benchmarking equipment that supports the Network Performance Score methodology.
- ▶ All measurements were performed in 5G preferred mode.

MEASUREMENT CAMPAIGN CONFIGURATION AND SETUP

VOICE SERVICE TESTING

Measurement device used for voice telephony testing: Samsung S25+ (SM-S928B)

- ▶ Mobile-to-mobile voice calls between two smartphones, VoLTE enabled
- ▶ Call length 75s in line with ETSI TS 102 250-2 and TR 102 506
- ▶ Alternating speech transmission in both directions using a speech sample in line with ETSI TR 103 138 and defined in ITU-T P.501 Annex D
- ▶ Speech Quality measurement in line with ITU-T P.863 POLQA v3
- ▶ Success, setup time and speech quality evaluated in line with ITU-T E.804.1

DATA SERVICE TESTING

Measurement device used for voice telephony testing: Samsung S25+ (SM-S928B)

Data transfer

- ▶ Successful upload and download of data files to a local cloud server (10MB download and 5MB upload)
- ▶ Maximal bitrate measurements in upload and download

Video streaming

- ▶ YouTube streaming test in line with ETSI TR 101 578 and ITU-T E.804.1
- ▶ Receiving video on demand and live streams for 45s
- ▶ Video Quality measurement in line with ITU-T J.343.1
- ▶ Success, access time and video quality evaluated

Web Browsing

- ▶ Accessing and retrieving web-content from different websites
- ▶ Testing of locally popular dynamic sites in different sizes
- ▶ In line with ITU-T E.804.1 and ETSI TR 103 733, success and download time evaluated

Post to Internet / Social Media

- ▶ Uploading data content (files) to WhatsApp (5MB size)
- ▶ In line with ITU-T E.804.1, success and transfer time evaluated

Interactive, real-time transport

- ▶ Assessing data latency and evaluating interactivity of transport
- ▶ In line with ITU-T G.1051 and ETSI TR 103 559 (v1.2.1)
