

TELIA SMART CONTROL

Telia processes personal data in Telia Smart Control application according to Telia Smart Wifi Privacy Notice and also general [Privacy Notice](#) of Telia Estonia AS shall apply where applicable.

Overview

Telia Smart Wifi is a service that helps you improve your wireless network (wifi) coverage. The service is provided through additional equipment delivered to customers and a smartphone application. Furthermore, the service introduces various extra features for managing a wireless network and enables better customer service should there be any problems with the service. The service settings are managed with the smartphone application, Telia Smart Control.

Before you proceed

Taking Telia Smart Control application into use is easy: free application is available in app stores of Android and iOS smartphones. The usage of application is free of charge. Users can log in to the application with Mobile-ID, Smart-ID or bank link. The application is available in several languages, including Estonian, Swedish and English, for example.

To use the application, the smartphone needs to be connected to the internet.

Others

Telia reserves the right to change the service and its features within the limits allowed by local legislation and regulations. The Terms of Use of the application and the Privacy Policy of the service can be viewed in the application and on our website.
